PROJECTS

School Management | *Reactjs, Nextjs, Node.js, Redux, Tailwind, React Hooks, Typescript*

Nov 2022 – Sep 2024

- Developed a application using with reactJs / NextJs, HTML, Tailwind CSS, and integrating a Node.js API, use mantine as a framwork that we can access components, Redux as a state management store.
- Integrate i18n package for creating multilingual website. Where we can create JSON files for translating the static texts.
- Implement access control for different users levels like Admin, Student, Teacher and Parents.

Livekeeping | *Vue2 and Vue3, Apex Charts, Vuex, HTML, CSS, VueRouter, rest api, Vuetify*

Dec 2024 – Present

- There's a company/product called LiveKeeping, which integrates with Tally (a popular accounting software) to provide real-time business data on mobile devices. It is aimed at business owners who want to access reports, stock details, and other key financial information on the go. Develop and mainatin CRM for the product sale and customer support.
- Created in Vue2, Vuetify2 for table and form management, Vuex as a state manegement store, Bootstrap, jquery HTML, CSS and Vuechartjs for graph implementations
- Now, we migrated it to Vue3 with help fo vite for better page speed optimization, Vuetify3 for common components, pinia as a state management store, Tailwind, HTML, ApexCharts for graphical representation, Aisensy for whatsapp on CRM support, Smartping for calling customers for support agents. Managed sales and leads within the CRM using Vue 3, WebSockets for real-time communication on both the CRM web and mobile platforms.
- Increase pages speed to 90+ to handle proper structure, use common apis, create different stores using pinia, create composable functions for reuse code on most of the parts.
