Vikash Jangir

Full Stack Developer | AI & Workflow Automation

+91 8813848260 | vikashjangir2301@gmail.com | GitHub | LinkedIn | Portfolio

Summary

Full Stack Developer with 4 years of experience building web applications with React.js, Vue.js, Node.js, and TypeScript. Currently developing AI-powered newspaper creation workflows at The Times of India, using RAG, LLMs, and n8n. Experienced in CRM platforms, application modernization, API integration, and production delivery.

Technical Skills

Web: JavaScript, TypeScript, React.js, Next.js, Redux, Vue.js, Nuxt.js, Vuex, Pinia, HTML, CSS
Backend & UI: Node.js, Express.js, MongoDB, REST APIs, Tailwind CSS, Vuetify, Material UI, Bootstrap
AI & Automation: RAG, OpenAI, Claude, LLMs, n8n, AI agents, agent skills
Tools & Practices: Git, Vite, Jest, WebSockets, Jira, Agile, CI/CD, Web Accessibility

Experience

Software Engineer Feb. 2026 – Present
Bennett Coleman & Co. Ltd. (The Times of India) *Delhi, India*

- Automated the newspaper creation workflow in collaboration with Adobe, using 10 years of historical newspaper data.
- Applied retrieval-augmented generation (RAG), OpenAI and Claude LLMs to support the newspaper creation process.
- Built workflow automation with n8n and AI agents, incorporating reusable agent skills into the publishing flow.

Software Engineer Oct. 2025 – Jan. 2026
Droisys *Noida, India*

- Revamped a gaming CRM with React.js, Redux, and TypeScript for casino owners to track games and user activity.
- Improved UI performance and maintainability through reusable components and optimized React architecture.

Full Stack Developer Oct. 2024 – Sep. 2025
Livekeeping (An IndiaMART Company) *Noida, India*

- Developed a Tally-integrated CRM for financial reporting, inventory, and business insights; delivered the Livekeeping website.
- Led migration from Vue 2 to Vue 3 with Vite, Vuetify 3, and Pinia; optimized shared APIs and reusable composables, achieving 90+ PageSpeed scores.
- Integrated AiSensy (WhatsApp), Smartping (calling), and WebSockets for sales and support workflows; managed production deployments.

Full Stack Developer Nov. 2022 – Oct. 2024
NxtBigByte *Rewari, India*

- Built and maintained React.js and Vue.js applications with reusable components, Redux, Pinia, Vue Router, and Jest.
- Led a development team and coordinated with designers, backend developers, and product managers to deliver web projects.

Selected Projects

Livekeeping | *Vue.js, Pinia, Vuetify, ApexCharts, REST APIs* 2024 – 2025

- Built CRM interfaces, data tables, forms, and financial visualizations for a Tally-integrated product serving web and mobile users.

School Management | *React.js, Next.js, Node.js, Redux, TypeScript* 2022 – 2024

- Built a multilingual school platform with Node.js API integration, i18n translations, and role-based access for administrators, students, teachers, and parents.

Education

Indira Gandhi University, Meerpur Rewari, India
Bachelor of Science (Non-Medical) *2020 – Dec. 2023*
